Heating & Cooling Rebate HVAC Tuneup

Inefficient HVAC equipment wastes energy and money.

Maintain your equipment to prevent future problems and unwanted costs. Keep your cooling and heating system at peak performance by having a contractor do annual pre-season check-ups. Contractors get busy during the summer and winter, so it's best to check the cooling system in the spring and the heating system in the fall. Plan the check-ups around the time changes in the spring and fall.

Rebate Process:

1. Select an HVAC contractor
CGEMC recommends getting at least 2-3 different bids.
2. Complete the heating and/or cooling tune-up.
3. **Submit the following information:**
Application with the customer's and HVAC contractor's signatures and copies of the invoice showing the date of work completed.
4. The rebate will be processed within 2-4 weeks after the properly submitted application and information is received.

Guidelines:

1. Application must be submitted before December 31, 2010.
2. Central Georgia EMC residential single family customers may qualify for up to a \$100 rebate to have a Tune-up performed on their Central Air Conditioner or on their Heat Pump.
3. Rebate will not exceed the cost of the preseason tune-up.
4. Rebate is not available for new construction .
5. A completed Rebate Application is required.
6. Application must be signed and dated by both the customer and HVAC contractor.
7. Customer must submit a dated, detailed invoice as proof of service completion. *Failure to provide required information may result in denial of rebate.*
8. Rebates are awarded on a first-come, first served basis until program funds have been depleted.
9. Rebate not valid on gas fired furnaces, must be electric heat pump.

Heating & Cooling Rebate HVAC Tuneup Rebate Form

Central Georgia EMC residential customers may qualify for up to an \$100 rebate to have a Tune-Up performed on their cooling system in the spring or on their Heat Pump in the Fall. Inspections and maintenance of heating and cooling systems ensure proper and efficient operation, and prevents untimely breakdowns. *Rebates are for HVAC tune-ups performed from August 1, 2010—December 31, 2010. Certain restrictions apply; see Guidelines.*
