2017 Monthly Electricity Cost	\$64.60						
Green Power Premium	\$ 4.50						
Total	\$69.10						

Price, Terms, and Conditions

Will my rates change over time?	The existing rate structure for your Central Georgia EMC Green Power service is presently fixed and determined by Board action. Many factors control this cost however we feel it will only change when contract conditions change or new, more costly, renewable resources are added to the program and we must adjust the price to account for the increased price of the new generation.
What sources will be used in my certified product?	Please refer to the Product Content Label below.
If I want to terminate this agreement/contract, what is the early termination fee?	There is no cost associated with terminating participation in Central Georgia EMC's Green Power program.
What length of agreement/contract is required?	No contract or re-enrollment is required. You will remain enrolled in Central Georgia EMC's Green Power program until you terminate your participation by notifying Central Georgia EMC.
What other fees might I be charged for?	There are no other fees associated with participation in Central Georgia EMC's Green Power program.

TOTAL	100%	100%	

1. The 2017 figures reflect the resources that were supplied for the year ending December 31, 2017.
2. The 2018 figures are prospective and reflect the power that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the electricity you purchased.
3. New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product includes generation from a facility that is approved for extended use by Green-e Energy.

For comparison, the current average mix of resources supplying Central Georgia EMC includes: Coal (7.41%), Nuclear (22.72%), Oil (0%), Natural Gas (65.9%), Hydroelectric (3.74%), and Other (0.23%).

The average home in the United States uses 897 kWh per month. [Source: U.S. EIA, 2016]
