I consent that a load management switch will be installed on my equipment, and I will continue to participate in the load management program as long as the program remains in existence. I understand that if CGEMC is unable to install a load management switch on my equipment, then I do not qualify for a rebate.

**\$100\***

#### TAX CREDIT INFORMATION

The Inflation Reduction Act offers considerable tax credits for purchasing and installing energy-efficient heating and cooling systems. However, to qualify, homeowners must select systems that are ENERGY STAR®-certified and exceed these SEER2, EER2, and HSPF2 minimums:

- Ducted split heat pump: 15.2 SEER2, 7.8 HSPF2, and 11.7 EER2
- Packaged heat pump: 15.2 SEER2, 7.2 HSPF2, and 10.6 EER2
- Mini-split system: 16 SEER2, 9 HSPF2, and 12 EER2

*A load management switch (LMS) on qualifying equipment by a Central Georgia EMC employee. If an LMS cannot be installed on the air-source electric heat pump or water heater, the equipment is not eligible for the residential rebate. The load management switch must remain on equipment and in operating status as long as CGEMC has a load management program. Limit one (1) qualifying water heater and one (1) qualifying heat pump rebate per member/household. To be eligible for the rebate, the heat pump and/or water heater must have been installed on or after January 1, 2025. Rebates are paid by check.*

*In addition to the residential rebate for your participation in the load management program, you will receive a bill credit of up to \$30 in November (\$20 for HVAC/mini-split, \$10 for water heater). Rebates are subject to change without notice. This rebate program ends on December 19, 2025.*
